Presentation of

Unification of Mail Client - Convert

UMCC for Lotus Notes

>> Overview

With several years of development experience, Unification of Mail Client – Convert (UMCC) meets the Lotus Notes messaging needs of your Lotus Domino infrastructure for businesses of any size.

Running under Lotus Domino release 6 to 8.5, UMCC offers some additional functionalities to the Lotus Notes client.

➢ Our software solution

UMCC for Lotus Notes allows the local archiving and the export/import of the Lotus Notes mails in the following format: Outlook / Outlook Express / Web / Lotus Notes. It allows to export/archive and import your Lotus Notes mails by a simple action (drag & drop or copy-paste) in the format Outlook / Outlook Express / Web / Lotus Notes in the folders of the Windows explorer. **UMCC** is a solution for working with multiple messaging software (Lotus Domino / Outlook Exchange / Web…)**.**

UMCC stores details of all manipulations or events in a log. You can then keep a detailed log of all actions you have chosen to take.

➢ UMCC for Lotus Notes

The UMCC tool allows :

- **To export** the emails received in a Lotus Notes mail file (NSF), to the Windows desktop or a folder of the Windows explorer. The existing export formats are Outlook / Outlook express / Web / Lotus Notes,

- **To import** individual emails in different formats (Outlook / Outlook express / Web / Lotus Notes) located on the Windows desktop or a folder of the Windows explorer to a Lotus Notes mail file (NSF),

- **To export** mails by a simple drag & drop or copy & paste action,

- **To import** mails by a simple drag & drop or copy & paste action.

- **To archive** the mail file by exporting the mails of each folder and by creating the same folder tree under the Windows explorer.
